

Fizzy Drink Survey

Create a **Google docs** spreadsheet using the following information.

You have been asked to prepare a spreadsheet using the results of a survey on the types of fizzy drinks people prefer. 3000 people were asked what their favorite fizzy drink is, and what their next preference would be if their favorite was not available.

- Apply appropriate number formats to your numbers
- Give your spreadsheet an appropriate title
- Create a column with a formula to calculate the average between 1st and 2nd Preference
- Create a column with a formula to show 1st Preference as a percentage (Preference/ Total)
- Create a column with a formula to show 2nd Preference as a percentage (Preference/ Total)
- Create a graph to show the comparison between 1st and 2nd Preference for each drink

Drink	1st Preference	2nd Preference
Pepsi	342	403
Coca Cola	359	367
7Up	238	290
Sprite	215	190
Mountain Dew	321	311
Fanta Orange	103	80
A&W Root Beer	180	380
Canada Dry	217	120
Lemonade	215	105
Barq's Root Beer	425	414
Coke Zero	203	67
Don't Know	182	273
